RFI Review Process

Panel 1

1.) Briefly describe your company, services, history, ownership, financial information, or other information you deem relevant. Please provide a contact person's name and telephone number for any clarifications.

2.) Is your organization capable of or interested in furnishing the items or services described in this RFI? Please describe both your history of furnishing the items or services and your capabilities for furnishing them in the future.

3.) Please provide the following information about your organization:

A) Profile of vendor's existing client base (e.g. health systems: hospitals, clinics, labs, payers, providers, and their respective services / projects)

B) Tenure (dates) of existing client (above)

C) History of enrollments/terminations of client base

4.) What issues do you feel need to be addressed in order to assure a successful project with regard to these items or services or preparation of an RFP?

5.) From your experience in providing these items or services, what lessons learned can you share with us?

Panel 2

6.) Cost estimate or range of cost (This is a cost estimate only. Any information provided will be used to assist us in developing a budget for the acquisition. You will not be held to any turnover or price provided).

A) What items or services need to be provided on a one-time basis? What is the estimated cost of each?

B) What items or services need to be provided on an ongoing basis? What is the estimated cost of each?

C) Are there any other items or services which will affect pricing? What is the estimated cost of each?

D) Are there any volume discounts or payment options which may affect pricing? What are the estimated cost savings of each?

E) How long do you estimate that it will take to provide each of the items or services described in this RFI?

A) What issues may affect the delivery or needs to be addressed in the preparation of an RFP?

Panel 3

B) Clinical and Claims based Analytics -- at a minimum include detailed information on:

A) The data management capabilities of your company's system including support for SQL Server, DB2, Oracle, and others

C) The provision and migration of clinical data, claims data, multi-dimensional clinical and claims data mark, and the engineering and support of OLAP data cubes

D) The ability to prevent the duplication of data resulting from extracting data from hospital and/or claims data and the engineering and support of OLAP data cubes

E) The ability to produce retrospective and prospective analysis of resource utilization and including predictive analytics of future resource utilization and projected outcomes

F) The ability for authorized users to access their data at the repository and warehouse levels, through their own data marts and data cubes, and to provide their own canned or custom reports

G) Identifying all national recognized quality measures that your offering supports "out of the box" or with some level of customization, and the capabilities of reporting on those measures

H) The ability to utilize event triggers to connect to hospital and practice based systems to obtain and exchange information

Panel 4

H) The ability for authorized users to copy and customize national quality measures and be able to track and report on these custom measures

I) The ability for authorized users to access and modify standard displays, dashboards and reports

J) Support for the creation, interactive access, and distribution of diagnosis and treatment based patient registries (e.g. Patient diabetes registry, smoking cessation registry, colorectal cancer screening registry, etc.)

K) Support for the creation, viewing, and distribution of patient and physician quality measures and treatment protocol based score cards

L) Hosting Hardware and Software -- at a minimum include detailed information about: High Availability capabilities for all hardware, data storage, and network components

M) Hardware and operating systems architecture: include detail information related to the use of physical and virtual server configurations; identify whether or not there is sharing resources across customers

N) Data storage technologies utilized and database architectures utilized; include detail information related to data backup and recovery processes and practices; Idaho Health Data Exchange (IHDX) requires that all data be stored in the cloud and that all data be encrypted at rest and in transit

Panel 5

O) Procurement of Additional and New Services

P) Product Maintenance and Support Process; include information related to frequency and timing of the application of product fixes

Q) Product Feature and Function Enhancement Process

R) Product Release Process; include frequency and schedule for releases

S) Involvement of DWH / HIC and associated workgroups in the testing and verification of usability and serviceability of product fixes, enhancements, and new features and releases

T) User Group Support; provide the process description for users to submit requests and suggestions for changes and improvements in products, services, and your process for the review and response to these items

U) Recommended staffing to support your company's system (e.g. position types and quantity)

V) For multi-vendor solution, provide details of each vendor's role and support responsibility prior to involving a third-party vendor to support product

W) Approach and goals towards knowledge transfer to customers in the areas of:

A) System Administration

B) Interface Development

Panel 6

X) Procurement of Additional and New Services

Y) Product Maintenance and Support Process; include information related to frequency and timing of the application of product fixes

Z) Product Feature and Function Enhancement Process

AA) Product Release Process; include frequency and schedule for releases

AB) Involvement of DWH / HIC and associated workgroups in the testing and verification of usability and serviceability of product fixes, enhancements, and new features and releases

AC) User Group Support; provide the process description for users to submit requests and suggestions for changes and improvements in products, services, and your process for the review and response to these items

AD) Recommended staffing to support your company's system (e.g. position types and quantity)

AE) For multi-vendor solution, provide details of each vendor's role and support responsibility prior to involving a third-party vendor to support product

AF) Approach and goals towards knowledge transfer to customers in the areas of:

A) System Administration

B) Interface Development

Panel 7

G) Identifying the available reports, displays, and dashboards

H) Certification of the components of your offering including the identifying organizations (e.g. HITSP, ONC, HIT Certification, etc.)

I) Support for 2-factor user authentication

J) HIPAA, HITECH, NIST and other security and privacy standards and requirements your offering is compliant

Panel 8

K) Support for 2-factor user authentication

L) HIPAA, HITECH, NIST and other security and privacy standards and requirements your offering is compliant

Panel 9

M) Support for 2-factor user authentication

N) HIPAA, HITECH, NIST and other security and privacy standards and requirements your offering is compliant
